predicandi. Secundo adiungit 2m capitulum quomodo predicantur equivoca. 3o ponit comparationem ad [illegible] in scientia. 2m capitulum quomodo predicantur univoca, et predicamenta univoce ponuntur de speciebus in scientiis. 3o ponit comparationem sic: sicut quia unum predicamentum comparatur ad istud aliud, ponitur predicatum, et capitulum quomodo predicantur denominativa, quia sicut unum predicatum sic denominative [illegible] ab alio predicatum.

Equivoca dicuntur

[illegible] primo modo predicandi in speciali qui est equivocum, et ideo [illegible] primo describendo [illegible] quia iste modus predicandi est quando aliquis [illegible] plures [illegible] equivoca quam univoca, sed de equivocis ponit [illegible] specialiter. 2a ratio quia in [illegible] prius docuit rationem ista quod in predicamentis ista arte, id est ista quod [illegible] sic in scientia, sed quia equivocatio in predicatione ponitur ante, ideo primo declarat de equivocis ipsa ratione a parte [illegible] que predicantur. Nota circa diffinitionem equivocorum quod sicut dicitur quod sunt equivoca equivocantia, ista tamen equivoca sunt [illegible] sicut [illegible] canis equivoce, sed canis latrabile [illegible] piscis celestis. Alia sunt equivoca equivocata: ista sunt equivoce [illegible] sicut [illegible] marina sidus celeste. Nota equivocatio equivocationis est duplex: quedam est a casu, quedam [illegible] plura sunt tam aliter sicut [illegible] capitalis [illegible] marinus. Aliud est a consilio [illegible] sunt plura [illegible] per prius aliud per posterius [illegible] [illegible] plures [illegible] plus aliorum ut [illegible] per [illegible] unum per prius [illegible] posterius [illegible] plura [illegible] [illegible] univoco. Nota quod [illegible] equivoca [illegible] [illegible] equivocatio [illegible] plures [illegible] diffinit [illegible] significare. Nota equivocatio [illegible] [illegible] ut [illegible] [illegible] [illegible] ut nomen [illegible] univoca [illegible] plurima ut [illegible] [illegible] Nota [illegible] equivoca sunt [illegible]

Notandum [illegible] silogismorum [illegible] nota [illegible] silogismus est duplex [illegible]

[illegible] affirmativus [illegible] affirmativus est in [illegible] [illegible] affirmativa ut silogismus in barbara [illegible] [illegible] negativus est [illegible] [illegible] et [illegible] [illegible] duo [illegible] [illegible] affirmativa silogismorum [illegible] dici de omni [illegible] dici de nullo [illegible] dici de omni est [illegible] [illegible] silogismorum affirmativorum [illegible] dici de nullo [illegible] regulativum silogismorum negativorum

[illegible]

Silogismus est oratio in [illegible] hic autem determinat de silogismo simpliciter

[illegible] silogismus [illegible] [illegible] silogismus [illegible]

[illegible]

forma est in secundis conclusionibus et non debet addi ista particula "contingit" quia non pertinet ad formam. [illegible] conclusione sed ad formam [illegible] de conclusione vel pluralis conclusionis. Secundo [illegible] premisse sunt consequentes; ergo [illegible] particula contingit quia non diffinitur syllogismus [illegible] quantitate sed formam [illegible]. Item dicitur aliud [illegible] debet intelligi quod ista debet esse alia a premissis [illegible] quod ad [illegible] quo admodum [illegible] per [illegible] ad [illegible] quo admodum [illegible] syllogismus ad [illegible] ut hic est [illegible]

Omnis autem syllogismus Hic [illegible] ex quibus constituitur syllogismus. Nota syllogismus compositus debet esse ex tribus terminis, qualis [illegible] tertia debet [illegible] syllogistice [illegible] quod non sit [illegible] syllogismus. Nota premisse [illegible] ad [illegible] alia et [illegible] conclusio non [illegible] quod ipsa non [illegible] ad [illegible] aliam. Nota [illegible] predicatur [illegible] quod sit [illegible] predicato [illegible] sicut [illegible] isto [illegible] predicatur [illegible] et [illegible] per [illegible] duo [illegible] composita syllogismum [illegible] ut [illegible] syllogistica [illegible] debent disponi ad [illegible] conclusionem.

Horum autem terminorum Hic [illegible] quibus constituitur syllogismus quod [illegible] ex quibus componitur syllogismus. Nota [illegible] syllogismo [illegible] duo [illegible] distincti [illegible] officium [illegible] et medium ut nullum [illegible] est animal omnis [illegible] est animal ergo [illegible] non est animal.

Ad syllogismum requiritur Hic [illegible] ad bonum syllogismum. Nota [illegible] syllogismum non est aliud nisi [illegible] syllogistici ordinati per debitam [illegible] et [illegible] quantum apta nata est [illegible] conclusio syllogistice et si non ordinatur [illegible] quod [illegible] ista conclusio non [illegible]

[illegible] medium [illegible] sit difformiter vel uniformiter [illegible] difformiter [illegible] uniformiter [illegible] et [illegible] ut [illegible] est [illegible] est terminata

Modus est ordinatio Hic [illegible] quid requiritur ad syllogismum [illegible] Nota modus syllogismi non est aliud nisi due premisse ordinate [illegible] debitam qualitatem [illegible] quod apta nata est [illegible] syllogismum ut omne animal est [illegible] omnis [illegible] est animal. Nota [illegible] syllogismo ad minus una premissarum debet esse universalis [illegible] quod omnis syllogismus debet regulari per dici de omni vel per dici de nullo [illegible] ambe premisse [illegible] non regulantur per dici de omni vel per dici de nullo quod dici de omni et dici de nullo sunt in propositionibus universalibus.

Unde dici de omni Hic ponit [illegible] ad syllogismum regulatur [illegible] figura [illegible] premissis [illegible] quod tales syllogismi non regulantur per dici de omni [illegible] dici de nullo [illegible] non [illegible] sub [illegible] alia [illegible] ut [illegible] est [illegible] est animal [illegible] et [illegible] premissis [illegible] quod [illegible] sequitur [illegible] ut [illegible] lapis est animal nullus [illegible] est lapis [illegible] est animal. Item si aliqua premissa est particularis [illegible] quod si conclusio [illegible] alia premissarum [illegible] particulariter [illegible] ut [illegible] est animal [illegible] est animal [illegible] quod non [illegible] medium [illegible] si aliqua premissarum est [illegible] quod [illegible] et debet [illegible] debiliorem partem [illegible] conclusio debet [illegible] premissarum.

Item medium [illegible] debet poni [illegible] syllogismo debet [illegible] aliud [illegible] quod ponitur [illegible] si medium [illegible] conclusione non [illegible] aliud [illegible] ut [illegible] est animal [illegible] est [illegible] debet intelligi medium [illegible] medium quod

spea continet est utrum ulla sit essentia primitiva vel non secundo intelligitur ab aliqua quod alia ulla est talis quod localia sit primitiva respectu istius in tertio quod aliquid sit secundum dicta tamen de ulla locutione et quibus sumpto primitive intelligitur quod primitive comparato non dicitur tempore per primitive in specie vel supposito sed ut opposito non nisi secundum per primitive in comparatione ut specie secundum quod ratio est singularis.

Altissimum non est. Sicut ponit ratione quod non videtur dicitur iam quoniam de ista quod dicitur iam quoniam non penitus adaptare speciem sed ad species alteriusque ut phiam italie et metaphisica est species primi sit quod similiter et quod introductionis tractatus de quibusdam ulibus modo si dicatur iam differentias et non dicatur similiter de quibusdam ulibus illud vero quod admodum. Sed dicitur ab utilitate sicut in dicitur de quibus ulibus non comparationibus ubi erat studium sicut nomen sunt cuilibet contrarie opiniones non solum de ulibus sed etiam de aliis. Prima sunt epicureorum qui posuerunt summum bonum et felicitatem consistere in temporalibus voluptatibus adoptabant collum ut ulla tamen saporis et dicitur ab epicuro qui posuit et cuius quod summam felicitatem posuerunt esse in virtute et in temporalibus. Secunda sunt stoicorum quorum princeps erat plato qui ponebat ulla esse idea simplicibus et dicitur a stoy. porticus quia in porticu docebat. Tertia sunt achademicorum qui posuerunt ulla esse in tanto et divina. Quarta sunt peripateticorum quorum princeps fuit aristoteles qui posuit summum bonum consistere in speculatione et dicitur a peri quod est circa et pateos via quia disputabant ambulantes. Sic tamen non recipiunt ulla in mente quod in illud sicut adhaeserunt sed porphirius ad dictum aliorum discipulorum et per velle sed peripateticos acceptis probabilibus disposuit de ulibus sic et per comparationem **Videtur autem**

in comparatione secundum quod quasdam ulibus et de sui in duo ipso dicitur de quibus ulibus prima de corpore qui tractatur et alibi commune et species tertia secunda quod quaelibet sit ulla ipso dicitur duplicite ipso dicitur multiplicite in corpore genus si non sit unum dicitur cum duplicite vos ut de primum porum apparere vel probabiliter et tamen non sit probabile et vel apparet quod non est ut in oppositum videtur et contrarie secunda est dicitur hoc non tamen pro ratione in modus vos tamen non sunt in addito secundum dicitur plurimus in theoricis simpliciter dicto quod sunt in addito dicto secunda pro ratione non sicut non opponitur sit dicitur de sic est pro ratione non per comparationem tertio pro est quod uniuersaliter vel uniuoce dictum dicitur primo multiplicite in corpore genus et si sunt quod dicitur quod est ut maximum genus ad unumquodque secundum cuiusque praedicatur corpore multiplicite secundo dicitur specie non praedicatur multiplicite aliorum ulla sunt quod pro ea in locis pro sibi quod multiplicantur corpore sicut quod genus et species sunt ulla magis probabilia et principalia et alia reducuntur ad ea tertio quia dicitur sit quodcumque multiplicite genus et species intelligitur quod sicut cuius magis principale quod secundum dicitur in quantum sit condita non genus quod ad istas tres sicut quod ponitur est quaestio a porphirio sed quod ad alias est quaestio actionum et in quibus quaestiones sit quaestio actionis et a porphirio non disputatur.

Genus non dicitur secundum quod comparatur rerum praedicto quaestio in genere refertur in tres sensus quod ponit tres acceptiones generis. Prima quod quasi dicitur cum ponit tres acceptiones generis tamen tamen sunt plures intelligitur quod in quantum per ratio tres sunt sicut sunt proposito secundo quasi dicit ponit tres acceptiones generis et aliis intelligitur quod in duo prima accipitur quod ea tamen genus tertio dicitur qua alie acceptiones non genus prima sunt describitur et collectio multorum sicut sunt

Nota quod isti duo motus non distinguuntur specie tamen quia eadem res est augmentatio et diminutio secundum aliud et aliud tempus. **In altera vero**
comune vero quia specialis modus de alteratione est talis ut pars alteratur. Quomodo de alteratione dicitur quod sit iste motus distinctus ab aliis
et videtur quod sit quia si motus esset idem quod alteratio debet augeri vel minui vel aliquo
alio modo moveri. Sed non est sic. Unde
sicut aqua alteratur et tamen non augetur neque
minuitur. Et sic patet quod aliquid augetur et tamen
non alteratur sicut patet de quadrangulo apposito gnomone. Unde gnomon est dicto
figura et equalis et tamen sicut ibi patet propter imaginationes inter punctos angulos. **Est autem**
simpliciter. Hic quia declarat de contrarietate motuum dicit quod motus et quieti opponitur
in specie contrarie. Unde motus contrarie alterationi
ut motus sursum contrarie deorsum. Nota
quod contrarietas motuum habet quamvis ut ex
procedit secundum aliquas per naturam opposita.

Habere multis modis dicitur
Hic declarat de ultimo predicamento quod
vocatur habitus et ponit octo acceptiones
habitus ut consuevit quod respectu vestimentorum
duplex et vel corporis contentum possessio
uxor etc. Hic modi sunt. Nota
quod predicamentum valet ad cognitionem principia
predicta et alia que sunt habitus et dispositio ubi
habitus vero ipsa acceptione est valet
ad predicamentum habitus quod ad istam acceptionem
est utilis ad cognitionem illarum perfectionum
hic quidem et dicitur et hic primo modus ut
virtutes et scientias quas concedat nobis deus
pater filius et spiritus sanctus una cum gloriosa

Quantitati vel est contrarium ut bicubito et superficiei vel est contrarium quia contrarietas primo inest qualitatibus et non omnibus sed quibusdam. Quantitas autem non est qualitas et per consequens quantitati non est contrarietas. Item quantitas non suscipit magis neque minus. Non enim una linea est magis linea quam alia et trinarius non est magis numerus quam binarius. Item proprium est quantitati secundum eam aequale vel inaequale dici ut numerus est aequalis vel inaequalis alteri numero et unum corpus est aequale vel inaequale alteri corpori et una linea alteri lineae etc.

Ad aliquid vero talia dicuntur quaecumque hoc ipsum quod sunt aliorum dicuntur vel quomodolibet aliter ad aliud ut pater filii, pater [illegible] dimidii duplum, filius patris, filius maior minore maius [illegible] filius [illegible]. Item relationes [illegible] species prima est [illegible] ut [illegible] cognationis [illegible] ut filius [illegible] [illegible] [illegible] [illegible] alia superpositionis [illegible] alia vero suppositionis [illegible] filius [illegible] alia suppositionis [illegible] duplum [illegible] dimidio [illegible]. Post hoc [illegible] quantitatis relationum prima est contrarietas et in relatione ut [illegible] vitio [illegible] sit ad aliquid. Hoc autem non [illegible] relatione duplo enim nihil est contrarium nec triplo. Item relata suscipiunt magis et minus ut simile dicitur magis et minus simile et aequale [illegible] non [illegible] duplum enim non suscipit magis et minus et

duplum necesse est. Similiter suscipit magis vel
minus. Item omnia relativa dicuntur ad con-
vertentiam ut si pater est filius est
et econverso et si dominus est servus est
et econverso et si duplum est dimidium
est et econverso. Item omnia relativa dicun-
tur natura simul cum est duplum et di-
midium pater et filius. Item relativa
posita se ponunt et perempta se
perimunt ut si pater est filius est et
si pater non est filius non est et si du-
plum non est dimidium non est. Alia
diffinitio relativorum talis est aliquid
sunt quibus hoc ipsum est esse ad aliquid
quodammodo se habere et hec diffinitio
est propria relativorum. Item si scitur unum

Qualitas est secundum quam quales
esse dicimur ut secundum albedinem
albi et secundum nigredinem nigri et secundum
calorem calidi et secundum iustitiam iusti.
Qualitatis autem quatuor sunt species. Prima
est habitus et dispositio. Differt autem
habitus a dispositione quia habitus est perma-
nentior et diuturnior ut virtutes et scien-
tie. Scientia cum est difficile mobilis nisi forte
fiat grandis permutatio ab egritudine
vel ab aliquo huiusmodi [illegible]
vel virtutes sicut scientia iustitia
vel castitas non de facili permu-
tantur. Dispositiones vero dicuntur que de facili
permutantur ut calor et frigiditas egritudo
et sanitas et cetera. [illegible] habitus possunt dici
dispositiones sed non econverso. Illi enim qui
habitum [illegible] disponuntur sunt ad bonum
vel ad malum sive ad melius vel ad
peius adeo que sunt dispositiones
[illegible] non sunt habitus quia habitus [illegible]
[illegible] habitus est qualitas difficile
mobilis a [illegible] dispositio vero est qualitas
facile mobilis. Secunda species qualitatis
est naturalis potentia vel impotentia ali-
quid facile faciendi vel patiendi ut
sanitas dicitur eo quod habet naturalem potentiam vel

a quibusdam accidentibus vel pariter
egrotativi dicuntur eo quod habent natura-
lem potentiam non cito sanandi.
Cursores vero et pugillatores
dicuntur sic non quia possunt actu
[illegible] sed quia habent naturalem po-
tentiam facile faciendi. Tertia species
qualitatis est passio vel passi-
bilis qualitas ut ille qualitates que
efficiunt in sensibus passiones
[illegible] gustum ut dulcedo amaritu-
do et similia. Et ille qualitates
[illegible] passionibus quantum difficile
mobilibus et permanentibus
sive egritudo sive ab aliqua
passione sive ab egritudine
vel ab [illegible] passibilis
qualitas. Quarta species
qualitatis est forma vel circa
aliquid constans figura ut
dispositio corporis, triangula-
tio, quadrangulatio, rectitudo,
curvitas. Qualia vero dicuntur
que secundum qualitatem [illegible]
ut a iustitia iustus
[illegible] a fortitudine fortis
[illegible] ab arte currendi cursor vel
que dicuntur ab aliqua qualitate
non denominative et dicuntur
ab aliqua qualitate eo quod
nomen non est impositum illi
qualitati a qua dicuntur qualia
ut cursor et [illegible] et
et nota quod cursor
pugillator dicuntur
[illegible] cursor et pugillator
ab arte currendi vel pugillandi
et [illegible] quod
alio modo dicitur cursor non
habeat artem currendi sed
quia naturale [illegible] cursor
facile faciendi et pugi-
[illegible] quod habeat artem pu-
gillandi sed quia naturalem
potentiam ad pugillandum
et illo modo dicuntur qualia

ab his naturalibus potentiis et non denominatur eo quod nomina non sunt imposita
his naturalibus potentiis a quibus dicuntur qualia et sunt cursores et pugillatores
sunt in secunda specie qualitatis. Alia non dicuntur qualia non denominative quia nomen
non sit impositum qualitati secundum quam dicitur quale secundum quod secundum eam non participat
illud nomen ut studiosus a virtute, et sunt simul dicti tres modi quales a qualitate
Inest autem qualitatibus contrarietas qualitatibus ut albedo nigredo iniustitia
iniustitia gratia sed quod autem non est contrarium qualitati quia non convenit omni figure
cum non sit contrarium neque aliquid medium colorum. Item si unum contrariorum fuerit
quale reliquum erit quale ut iniustitia iniustitia sed gratia iustitia autem
est qualitas ergo iniustitia est qualitas, et iniustum est quale ergo iniustum
est quale. Item qualitas suscipit magis et minus iustus enim magis et minus
est iustus et sanus et albus sed quod non est contrarium sed quale si convenit adeptum
dicitur iustus et sanus non suscipit magis neque minus nec circulus neque triangulus sunt tamen
qualia. Item proprium est quale secundum eam aliquid simile ut dissimile dicitur
ut albus albo similis esse dicitur et iniustus iniusto albus a nigro dissimile
Actio est secundum quam aliquid in id quod subicitur agere dicitur ut secans dicitur
aliquid eo quod secat. Vnde sectio est eius actio et secundum sectionem agit
secans in eo quod secat et passio est eius actio. Item proprium est actionis
et passionis recipit autem agere et pati contrarietatem
calefacere enim contrarium est ei quod est frigefacere, et calefieri et frigefieri
et delectari et tristari magis et minus dicuntur
Passio est effectus illatus ab actione ut calefieri efficitur et inficitur
calefacere. Item proprium est passionis primo inesse quod actioni. Item passio
non est in agente sed in patiente. De reliquis autem dicta sufficiant
Dicitur alterum alteri opponi quadrupliciter, oppositorum autem alia sunt
relative opposita ut pater et filius duplum et dimidium. Alia sunt privative
opposita ut privatio et habitus ut auditus et surditas cecitas et visus
Alia sunt contradictorie opposita ut affirmatio et negatio ut sedet non
sedet. Alia sunt contrarie ut album nigrum, calidum frigidum. Alia sunt relative dicuntur
et superius. Contrarie opposita sunt que sub eodem genere posita sunt et maxime
a se invicem distant et mutuo se expellunt et circa susceptibile
vicissim insunt nisi alterum insit a natura ut albedo a cigno nigredo
a corvo. Caliditas autem non est in igne ut accidens in subiecto. Immo ut
in corvo. Caliditas autem non est in igne ut accidens in subiecto sed ut
in subiecto. Item contraria cum quedam sunt que cadunt in
subiecto in eo cuius est subiectum aliquid, vel secundum proprietatem sed potius secundum principium et
diffinitionem alicuius ut punctus a diffinitione linee et unitas in
numero vel quantitatis ut punctus et diffinitio. Et iste modus essendi in generali sub certo modo
diffinitionis unum. Et iste modus essendi unaqueque pars diffinitionis est
essendi in secundum quem modum essendi unaquaque pars diffinitionis est
in suo diffinito et probat quod ignis non est subiectum caliditatis sed materia
est cum caliditas est in materia sicut ignis in subiecto. In igne vero non est
ut in subiecto sed in eo cuius subiectum est. Privative autem opposita sunt circa idem
ut in subiecto sed in eo cuius irregressibili tempore determinato et de
necessitate fieri habet ordine irregressibili tempore determinato et de
habitu habet devenire in privationem et non econverso quamquam licet in eum fieri
irregressibili privatione in habitum ut visus et cecitas habet fieri circa
oculum ut a visu pergit secundum naturam in cecitatem et non econverso quia nam

iste modus est alienissimus in eo quod est habere quia vir habet uxorem et ab
habetur ab ea vinculo cum matrimonii indissolubiliter ligatur
utraque est et quod forte etiam alii modi apparebunt de eo quod est habere
sed qui consueverunt dici pene omnes enumerati sunt

Propositio est oratio affirmativa vel negativa alicuius de aliquo
vel alicuius ab aliquo. Terminus est in quem resolvitur propositio ut in
subiectum et praedicatum. Dici de omni est quando nichil est sumere sub subiecto
de quo non dicatur praedicatum ut omnis homo currit cursus dicitur de quolibet homine.
Dici de nullo est quando nichil est sumere sub subiecto de quo non removeatur
praedicatum ut nullus homo currit cursus removetur ab omni homine.
Syllogismus est oratio in qua quibusdam positis et concessis necesse est
aliud accidere per ea que posita sunt et concessa ut omne animal
est substantia omnis homo est animal ergo omnis homo est substantia. Et totum est oratio in
qua ex duabus propositionibus positis et concessis in duabus propositionibus praemissis necesse est
[illegible] aliud in conclusione. Terminus et silogismus constat ex tribus terminis quorum
unus dicitur maior extremitas alius minor
in duabus propositionibus quia tres non possunt sicut duae propositiones nisi alter illorum sumatur
bis ut [illegible] aut subicitur in una et praedicatur in alia vel praedicatur
[illegible] et [illegible] aut subicitur in utraque, horum autem terminorum alter vocatur medium
in utraque vel subicitur in utraque alter minor extremitas
alter maior extremitas. Medium est terminus bis
sumptus ante conclusionem. Maior extremitas est terminus sumptus in maiori propositione cum
medio. Minor extremitas est terminus sumptus in minori propositione cum medio.
Sequitur de modis et figuris. Figura est ordinatio
ad syllogismum [illegible] debita subiectione et praedicatione. Fiunt autem ordinationes
trium terminorum sicut sunt tres figurae. Prima figura est quando id quod subicitur in
prima et praedicatur in alia ut omne animal est substantia omnis homo est animal ergo omnis
una et praedicatur in alia. Secunda figura est quando idem praedicatur in utraque ut omnis homo est animal nullus
lapis est animal. Tertia figura est quando idem subicitur in
utraque ut omnis homo est animal omnis homo est risibilis
Modus est ordinatio duarum propositionum in debita qualitate et quantitate

Prima figura habet novem modos quatuor directe concludentes et quinque indirecte. Directe concludere est maiorem extremitatem de minori predicari in conclusione. Indirecte concludere est minorem extremitatem de maiori predicari in conclusione. Patet quod habet duas regulas. Prima regula ... generat primum et tertium ... secunda generat primum quartum ad quatuor modos primum etc. quo ad omnes.
Prima regula talis est. Dici in quatuor modis prime figure directe concludentibus minorem ... nichil scilicet ... in eadem prima figura maiorem ... particularis nichil scilicet ... Primus modus prime figure Barbara constat ex duabus universalibus affirmativis universalem affirmativam concludentibus ut omne animal est substantia omnis homo est animal ergo omnis homo est substantia. Secundus modus Celarent constat ex universali negativa et universali affirmativa universalem negativam concludentibus ut nullum animal est lapis omnis homo est animal ergo nullus homo est lapis. Tertius modus prime figure Darii constat ex universali affirmativa et particulari affirmativa particularem affirmativam concludentibus ut omne animal est substantia quidam homo est animal ergo quidam homo est substantia. Quartus modus Ferio constat ex universali negativa et particulari affirmativa particularem negativam concludentibus ut nullum animal est lapis quidam homo est animal ergo quidam homo non est lapis.

Septimus modus Dabitis constat ex universali affirmativa et particulari affirmativa particularem affirmativam concludentibus indirecte ut omne animal est substantia quidam homo est animal ergo quedam substantia est homo et reducitur ad tertium modum prime figure per conversionem conclusionis simplicem. Octavus modus Fapesmo constat ex universali affirmativa et universali negativa particularem negativam concludentibus indirecte ut omne animal est substantia nullus lapis est animal ergo quedam substantia non est lapis et reducitur ad quartum prime per conversionem maioris ... simpliciter et per transpositionem premissarum. quando ita formatur ita quod ipsa in [illegible]
non sua quando [illegible] ordinatur et est [illegible]
[illegible] sic [illegible] est substantia sic

Item augmentum sit substantia in loco quia augmentum
non est substantia in suo loco sed [illegible] quia
si hoc augmentum esset substantia in loco maxime
esset aliquid [illegible] dubitabile quod assignatur pro
[illegible] nec [illegible] sed non est dubitabile sicut esset
maxime [illegible] quod [illegible] [illegible] demonstrative
[illegible] sed [illegible] est [illegible] quia posito [illegible] quod nulla
sit augmentum in toto mundo esset adhuc locus
[illegible] ergo non [illegible] dependentiam ab [illegible]
[illegible] [illegible] [illegible] [illegible] sit substantia
[illegible] est quia [illegible] sua non est [illegible]

[illegible] 4ta [illegible] ut [illegible] quia [illegible] sit [illegible]
[illegible] sua et quod [illegible] **Contra** [illegible] locus
[illegible] est augmentum substantia ergo [illegible] substantia [illegible]
quia [illegible] sua ergo non in loco [illegible] quia si
[illegible] ergo in [illegible] et [illegible] [illegible]
[illegible] [illegible] [illegible] non est [illegible] substantia

augmentum substantia ergo non [illegible] quia in sua loci
[illegible] [illegible] [illegible] non est [illegible] substantia ergo sua
non est [illegible] substantia quia [illegible] non ergo non [illegible] non
quod sua [illegible] duobus [illegible] [illegible] assumitur [illegible]

[illegible] sic ego nego.

Contra adhuc augmentum non est substantia in loco
[illegible] [illegible] quia quia hoc suppositum ergo non [illegible]
quia hoc [illegible] [illegible] [illegible] [illegible] substantia in

quod est universale non est necessarium [illegible]
necessarium ad notitiam quorumcumque praedicamentorum [illegible]
[illegible] necessarium [illegible] non universale non
necessarium [illegible] notitia [illegible]
[illegible] ly necessarium [illegible]
ad propositum [illegible] quod non potest non esse [illegible]
et [illegible] est necessarium [illegible]
non potest non esse et isto modo ly necessarium non [illegible]
[illegible] ly necessarium [illegible] potest utile [illegible]
quod [illegible] quod est universale est necessarium id est
utile et isto modo [illegible] quod
potest [illegible] ad [illegible] [illegible]
est [illegible] potentia [illegible]
[illegible] non [illegible]
[illegible] quod est universale [illegible]
quia non [illegible] notitia [illegible] universalium [illegible]
[illegible] quia [illegible] universalium [illegible]
est [illegible] maior [illegible] universalium quia si
[illegible] universalibus [illegible] non [illegible]
universalium [illegible] universalium [illegible] et

locum absque hoc quod habet habeat notitiam ultimam quamquam igitur sic arguitur per unum genus quod potest assignare diffinitionem boni non habita notitia quamquam ultima sic. Arguitur secundo quod, quomodo ergo igitur continget sine notitia priori quo ad modum procedendi et per quem potest assignare diffinitionem sine notitia quamquam ultima id est sufficienti. Nego quod notitia quamquam ultima est necessaria ad assignandum diffinitionem. Ideo quod notitia qua quis potest assignare diffinitionem boni non potest habita actualiter et perfecte absque notitia quamquam ultima possibili habita secundum imperfecte et usualiter ut de quamvis quibus non tamen confusa et usualis, assistit in assignando diffinitionem et ideo dicitur quod quo utitur de assignatione actuali diffinitionum. Adhuc non est necessaria ibi notitia prima, patet quia [illegible] ergo est quod diffinitionum notitia est necessaria ad notitiam quamquam ultimam primo quia non valet consequentia quod utrumque per diffinitiones quia licet quis sit sic sit sequitur quod esset circulatio in causis simul. Nego primum quod quidem est ultima est ipso probatio per convenientem quod circulus quod diffinitio ut probatum est non datur in demonstratione intelligi perfectis conclusionibus multum ponitur de quo circulus est modicum valet ad notitiam perfectorum et diffinitionum de ad notitiam quod diffinitionalis valet diffinitiones et talis notitia ultima iterum ergo in proposito secundum diffinitiones sit necessaria adeo est ultima non tamen ac ut esset eadem id est eadem generatione causa patet iterum.

Notitia quamquam ultima non est necessaria ad assignationem diffinitionum quia sufficit [illegible] sequitur quod notitia quamquam ultima esset per cognitionem si quod est simul quod sequitur quod sine cognitione perfecte cognoscibilis quia quod notitia quamquam ultima est per [illegible] notitia quod est per cognitionem quod [illegible] per quod id est. Nego per cognitionem tamen duplex [illegible] quia secundum per cognitionem est preassignata igitur quod secundum de id quod per requiritur ad quamvis notitiam ultimam quia per cognitionem secundum significatam potest dici preassignata eo quod sit prius quamvis in causa simul id est ad quamvis notitiam sufficit sed esset notitia quamquam ultima est

perfectio esset notitia perquirit ad quamvis notitiam perfectam divisionum et diffinitionum de quo causa patet tamen de [illegible] causa a philosopho primo posteriorum dicitur quod sunt per cognitiones sed quod est et quia est et si per cognitionem est cognitio intellectualis ad omnem demonstrationem necessaria et non acquiritur per causam de. Et omnino ad eam quod sit in demonstratione et.

Si potest [illegible] et quanta utilitas sit ultima quibus quod necessaria est quod est ultima omnino ad ea que sunt utilia in demonstratione et divisione et est quod quanta composita et potest intelligi eadem ut predicta. Et dicitur omnino ut sit utilis dicit quod licet valet ad ea quod dicta sunt in principio et omnino valet ad demonstrationem.

Tertio notitia ultima sit necessaria ad divisiones quod notitia quamquam ultima non est necessaria ad notitiam divisionum ergo consequentia tenet quod ad probandum potest falsa [illegible] quod sit assignare divisionem boni absque notitia quamquam ultima ergo [illegible] quod ipse cognoscit simul de notitia quamquam ultima assignat divisionem boni ergo [illegible] quod dicitur alia quod alia imperfecta et notitia quamquam ultima est necessaria ad assignandum divisionem et nego quod non est necessaria ad quamvis divisionem ideo duplex est divisio scilicet realis et localis [illegible] quia ad nos ad divisionem in partes per se formales est duplex [illegible] in partes eas in numero in partes numerata non dicitur quamvis de divisione locali [illegible] in partes numerata et ulterius dicitur ad argumentum quod [illegible] divisio fiat et non fiat divisio id est quod est divisio bona fiat [illegible] id est fiat quod est divisio bona et [illegible] actualis sine composita supposita ipse cognoscit non sit ideo consistit modus dividendi eo quod non habet notitia quamvis ultima qua modus dividendi consistit ideo ut [illegible] divi[illegible] divisione et est generaliter dico oppositum.

Tertio notitia quamquam ultima sit necessaria ad demonstrationem quod notitia quamquam ultima non necessaria ad demonstrationem ergo quod [illegible] omnis ultima [illegible] non quod non omnis. Notitia [illegible] ultima non est necessaria ergo non omnis quod notitia quamvis [illegible]
